THE volunteer army passed into history yesterday, the last three regiments being mustered out at San Francisco. The antics who have for two years worried so much over Emperor McKinley and his awful army, should now rest easier.

SOME sections of Kansas are having a drouth the like of which has not been seen in that state for a quarter of a century. As a result the corn crop is suffering and in many counties will not at the best make more than a half crop. The farmers of the state are, however, harvesting one of the best wheat crops they have ever had, and there is not likely to be hard times in Kansas even if the corn crop is a partial failure.

THE difference between the industrious young man and the one with no particular aim in life is easily seen during the vacation period. The industrious young man sets about without any waste of time to find something to do that will prove profitable or that will give him skill in some line of business, while the young man who has no particular aim in life and no ambition kills time waiting for something to come his way. The one grows up to be a useful man, while the other becomes what chance may make of him.—Wymore Wymoean.

## GOOD AGE TO LIVE IN.

The other day some of New York's clever surgeons laid out an array of cruel looking knives, forceps and saws and then went to work on Isidor Levine, thirteen years old, who had health, strength, and whose brain stopped growing in his baby days. He couldn't learn. In a few years would come manhood and a pitiful object, repulsive because unnatural.

Not many years ago Isidor's case would have been considered hopeless. Bigoted people would have asserted that Providence had afflicted him, and it was not for human beings to question the doings of the power that moves the world.

But science is moving. The speed is tremendous, and these skilled men discovered that Isidor's skull was very thick and the brain was in a natural prison. It couldn't grow.

They promptly cut away the skull on the stunted to give the brain room, and left a temporary opening, so that there could be no pressure on the gray matter, and later will close the hole with a silver patch.

Every minute science is doing something to make life more certain and health more robust.

It is a good age to live in.—Omaha News.

## Y. M. C. A. NOTES.

It was plain and unvarnished, the address last Sunday given by Mr. M. A. Wolfe, secretary of the Grand Island Y. M. C. A. A more attentive audience of young men could not be found. They will not forget soon some of the things said. Regrets have been expressed by some that every young man in the Platte was not there to hear him.

The rooms will be open as usual on the Fourth. Strangers will be welcome. S.

Chicago forecast for North Platte and vicinity. Generally fair tonight and Wednesday with probably thunderstorms. Thursday: Generally fair except possibly local thunder storms. The maximum temperature yesterday was 83, one year ago it was 93. The maximum temperature this morning was 65, one year ago it was 60.

From Observer Percy's summary we learn that during the month of June the rainfall was 3.69 inches and that the rain fell on eight different days. The mean temperature for the month was seventy degrees which is two degrees warmer than the average. The highest temperature reached was ninety-nine degrees. During the month the total movement of wind was 6,997 miles and the highest velocity attained forty-one miles per hour.

Ed. P. Cooney was arrested at Lexington for violating the liquor law. He was released from custody upon his own recognizance to appear in court Thursday but he failed to show up and it is thought he has skipped the town.

After making a careful canvas of the northwest territory and preparing conservative estimates upon the condition found throughout the grain belt, traffic officials of the St. Paul, Northwestern, Northern Pacific, Great Northern and Burlington systems are agreed that the wheat crop of that region for 1901 will break all previous records. According to the estimates of these officials it is asserted that the two Dakotas and Minnesota alone will harvest between 185,000,000 and 200,000,000 bushels of wheat, as against 100,000,000 last year. The greatest previous yield of wheat in the three states named was in 1898, when 172,000,000 bushels were harvested.
